

New: Oscilloscopes from Rohde & Schwarz.

Two product families from the T&M expert.

What customers have often requested is finally available: oscilloscopes from Rohde & Schwarz. A welcome addition to the company's comprehensive T&M portfolio. As always, users benefit from the high quality and in-depth development and production expertise at Rohde & Schwarz. Analog, mixed signal and digital integration; software, RF and digital development; production from printed board to finished product all take place in-house. The result: two new oscilloscope families covering bandwidths from 500 MHz to 2 GHz.

R&S®RTO: Analyze faster. See more.

A key oscilloscope application is to quickly find and correctly display errors in analog and digital signals. The R&S®RTO oscilloscopes combine high signal acquisition and analysis rates with outstanding signal fidelity. The fastest measurement rate of 1 million waveforms/s quickly finds even the rarest of errors, and the hardware-accelerated realtime analysis displays the results directly on the screen. This unprecedented speed significantly improves the active acquisition time. And the purely digital trigger, a first for oscilloscopes, means minimal trigger jitter. The well-thought-out operating concept brings order to the screen and sets standards for easy-to-use, state-of-the-art touch screens.

R&S®RTM: Compact, precise, versatile.

Due to their excellent measurement properties and wide variety of practical functions, the R&S®RTM oscilloscopes facilitate daily work in product development and service. Their compact dimensions, simple operation and brilliant display make them the first choice for everyday test and measurement tasks.

Overview of models

R&S®RTO base unit	Bandwidth	Channels
R&S®RTO1024	2 GHz	4
R&S®RTO1022	2 GHz	2
R&S®RTO1014	1 GHz	4
R&S®RTO1012	1 GHz	2
R&S®RTO1004	600 MHz	4
R&S®RTO1002	600 MHz	2
R&S®RTM base unit	Bandwidth	Channels
R&S®RTM1054	500 MHz	4
R&S®RTM1052	500 MHz	2
